

STEPANENKO SERHII

Front-End Developer

I am a highly motivated aspiring engineer with no commercial experience but with a strong desire to learn more about software development. Every day I work on my pet projects. Also I undergo now an internship in one of the IT companies. I know a lot. What I do not know - I will find. What I will not find - I will kindly ask my colleagues. At the moment I am looking for an in-office position in Kharkiv-based company or on remote.
